The goal of the challenge is to celebrate the data visualization legacy of W.E.B Du Bois by recreating the visualizations from the 1900 Paris Exposition using modern tools.

This directory contains the data and original plates from the exposition; your goal is to re-create the visualizations using modern tools of your choice (Tableau, R, ggplot, Stata, PowerBI, decksh, etc)

There is a folder for each challenge, which includes the images of the 1900 original plates along with the corresponding data. You may submit your re-creations to twitter using the hash tag #DuBoisChallenge2023 .

Note that for 2023, we will expanding the challenge to the Data Visualization Society Slack, as well as Mastodon on vis.social

Took me a minute because I wanted to learn D3 first 😅, but here is my visualization for Challenge 1.

My favorite part of this challenge so far is that it's growing my appreciation for DuBois' Data Portraits (there are so many meticulous details that start to emerge along the way). As for this chart in particular, I love how its legend adds more context beyond just labels for each color.

The chart displays the proportion of higher education enrollments for Black and White students across various fields. The legend indicates the following fields:

- LAW AND BUSINESS (Red)
- EDUCATION AND OTHERS (Blue)
- ENGINEERING & PRODUCTION, COMPUTER AND NATURAL SCIENCES (Yellow)
- ARTS, SOCIAL AND HUMAN SCIENCES (Brown)
- HEALTH AND WELLNESS (Light Blue)

Black students account for 30% of Law and Business, 25% of Education and Others, 23% of Engineering, Production, Computer and Natural Sciences, 19% of Arts, Social and Human Sciences, and 19% of Health and Wellness. White students account for 29% of Law and Business, 20% of Education and Others, 19% of Engineering, Production, Computer and Natural Sciences, 9% of Arts, Social and Human Sciences, and 7% of Health and Wellness.
