The Philadelphia Negro, 1897

Proportion of Population.	1848.	1880.	1890.*
Under 5 years	14.7	9.8	7.8

Over 50 years	9.9	. . .	6.1‡

This table is too meagre to be conclusive, but it is probable that while the age structure of the Negro urban population in 1848 was about normal, it has greatly changed in recent years. Detailed statistics for 1890 make this plainer:

Storytelling

Storytelling is about balance

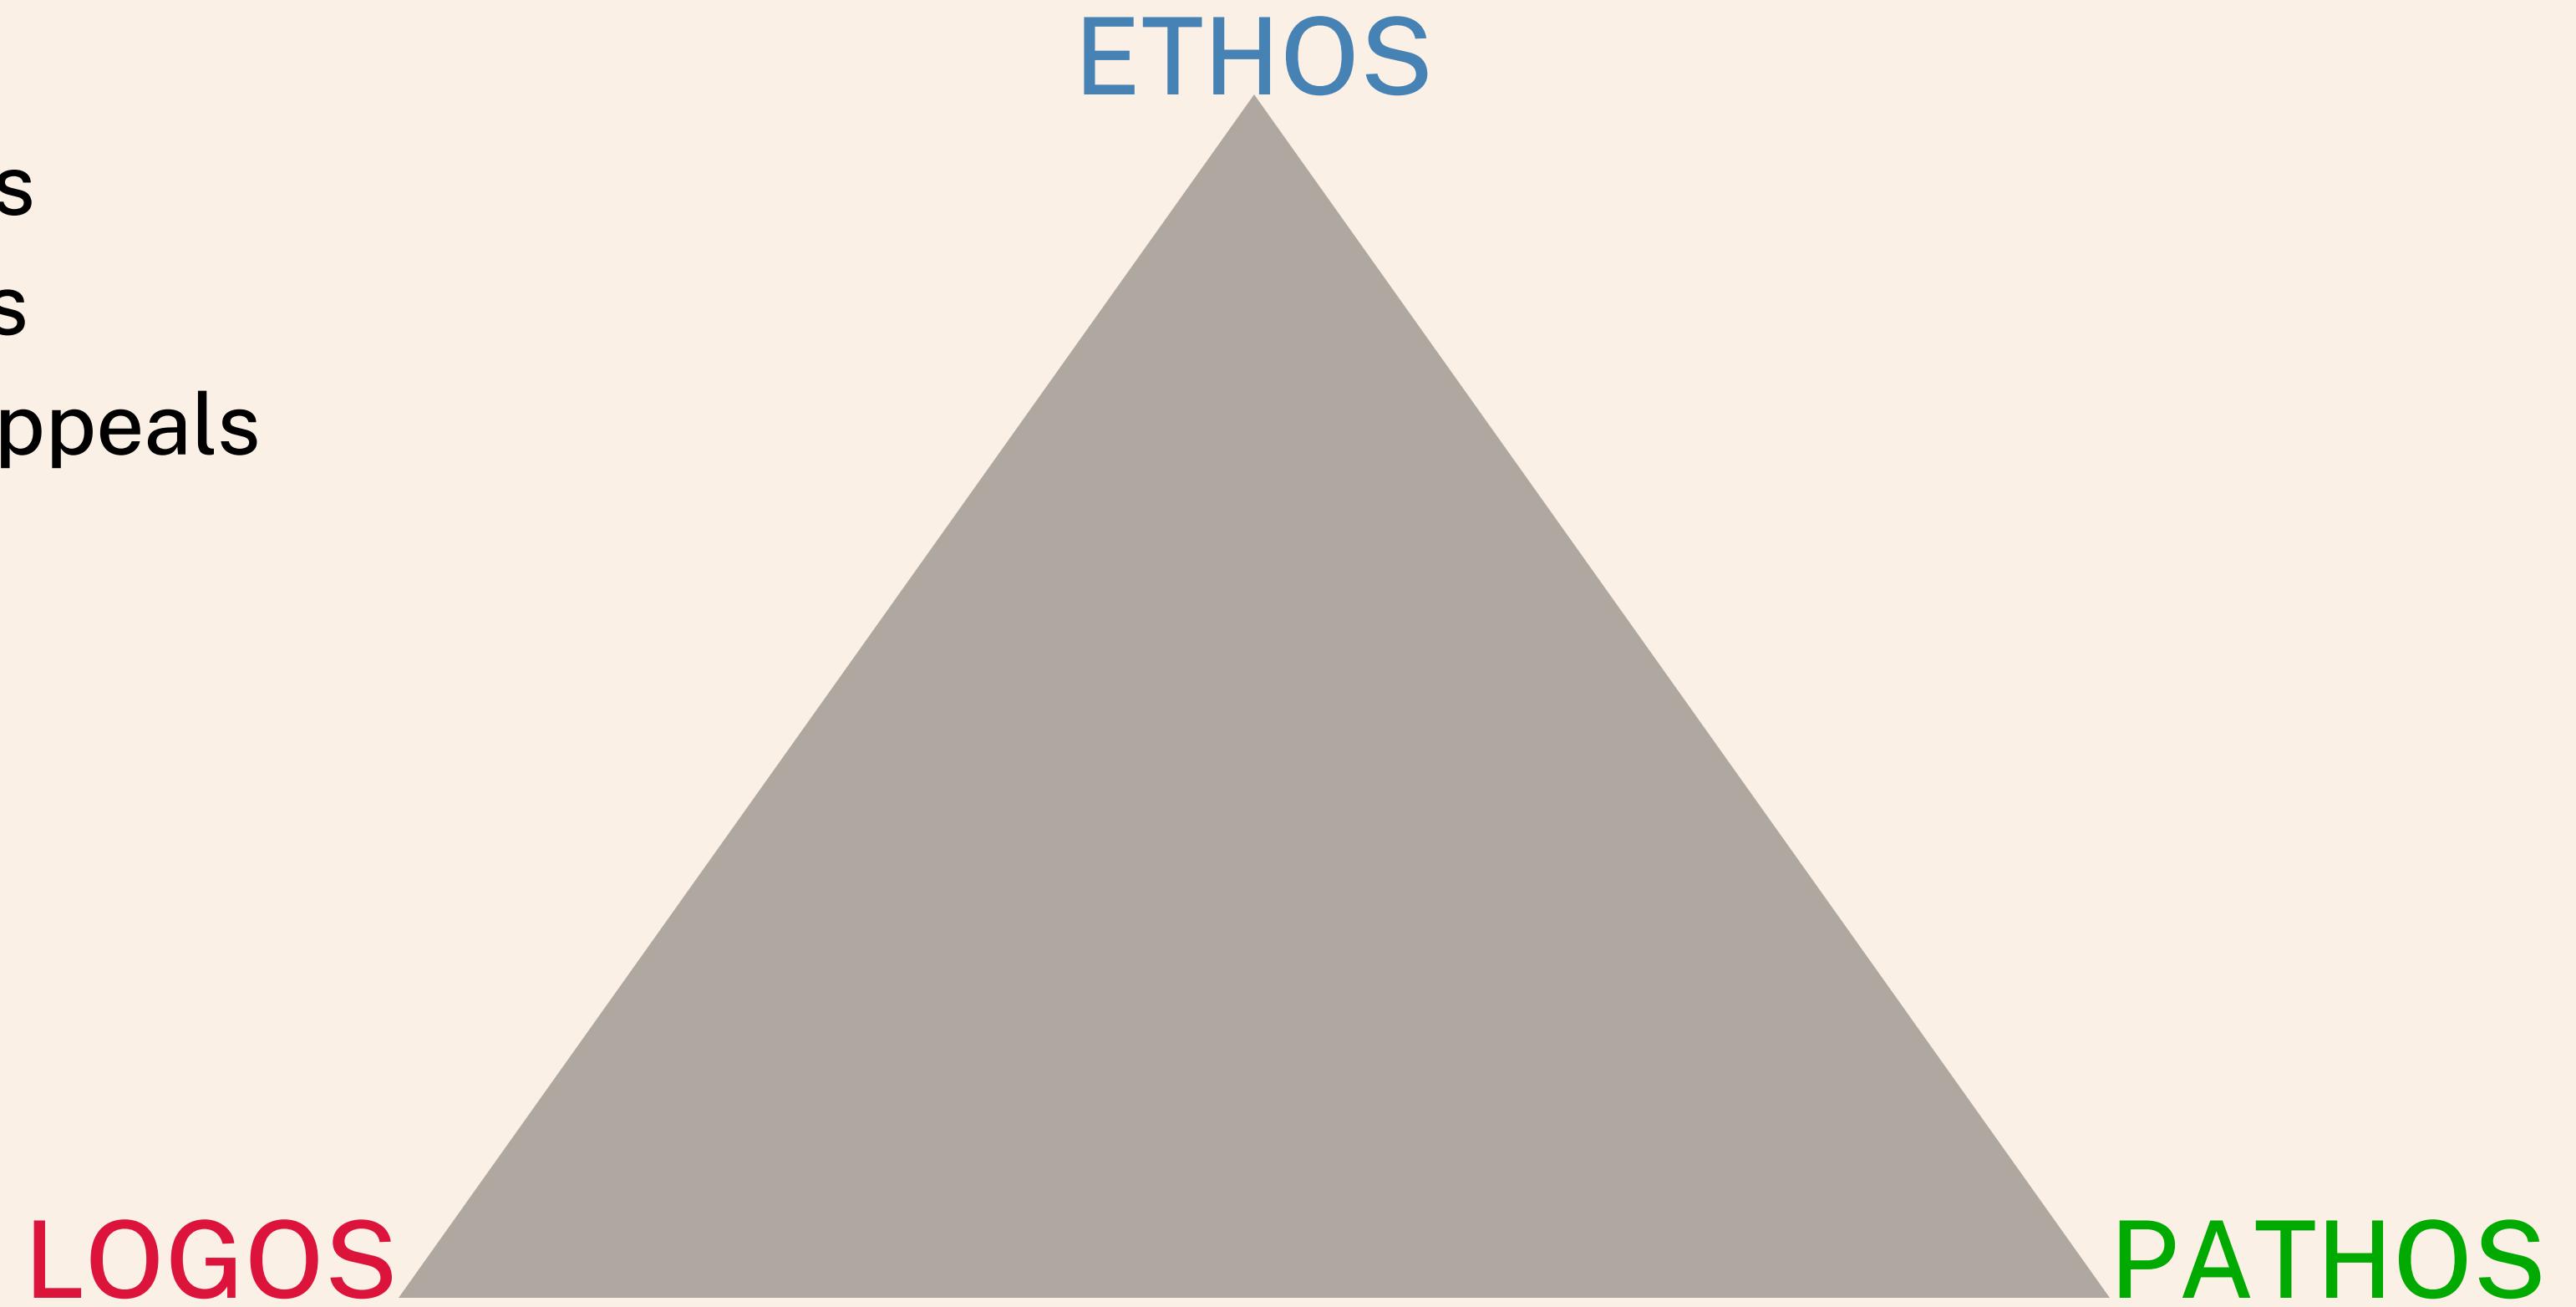

W.E.B. Du Bois sought to combine science, data, and methodology into sociology. His research into Black American culture told a story of resilience

Aristotle's Rhetorical Triangle

Aristotle thought that a speaker's ability to persuade an audience is based on how well the speaker appeals to them through

- ETHOS: Ethics (Credibility)
- PATHOS: Emotion (Feeling)
- LOGOS: Logic (Data)

Du Bois developed a socialological framework to show Black Americans are capable of functioning as social equals, social Darwinism has no data to back its theory.

Tell Stories Like Pixar

Once upon a time there was _____

Every day _____

One day _____

Because of that _____

Because of that _____

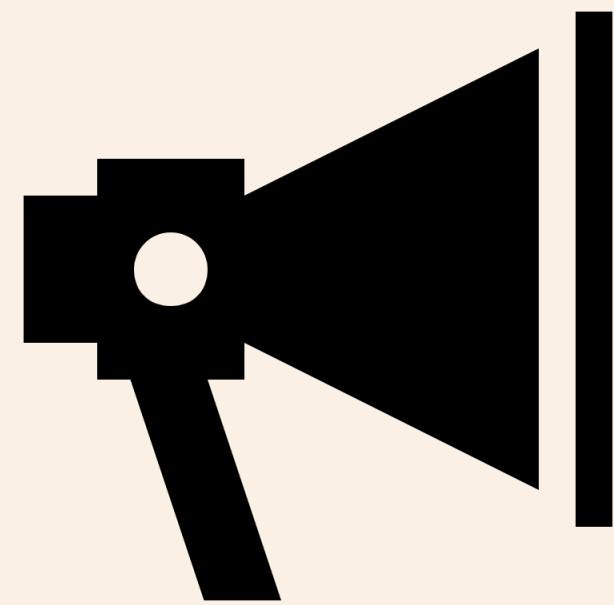

Until finally _____

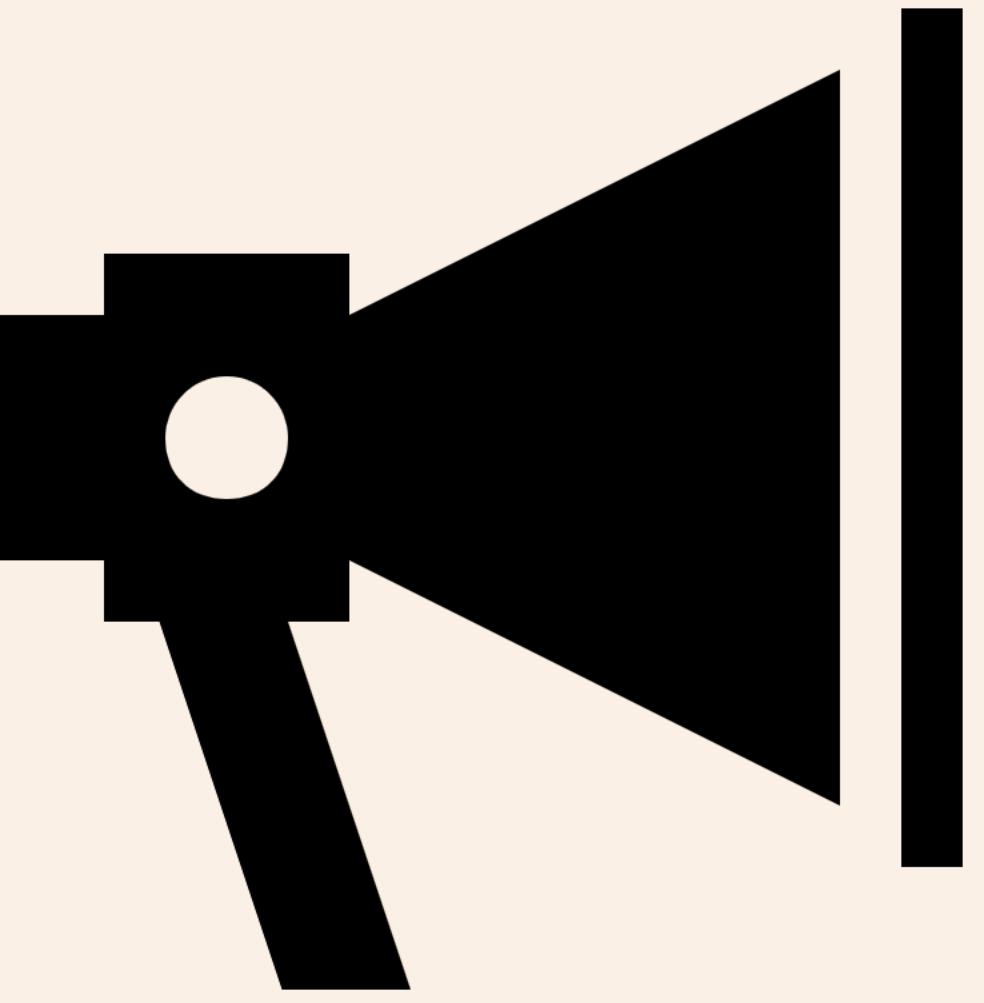

Themes from Great Stories

I decided to recreate challenge 07 using only coord_polar. It is not a perfect recreation, but I am happy with it (mostly because I didn't have to use my very rusty trigonometry knowledge).

I'm thrilled that any @Stata user can now add the Du Bois graphing scheme to their machine using the *ssc install dubois* command. After installing, check *help dubois* for tips to use the scheme for the #DuBoisChallenge or modern replications like this one!

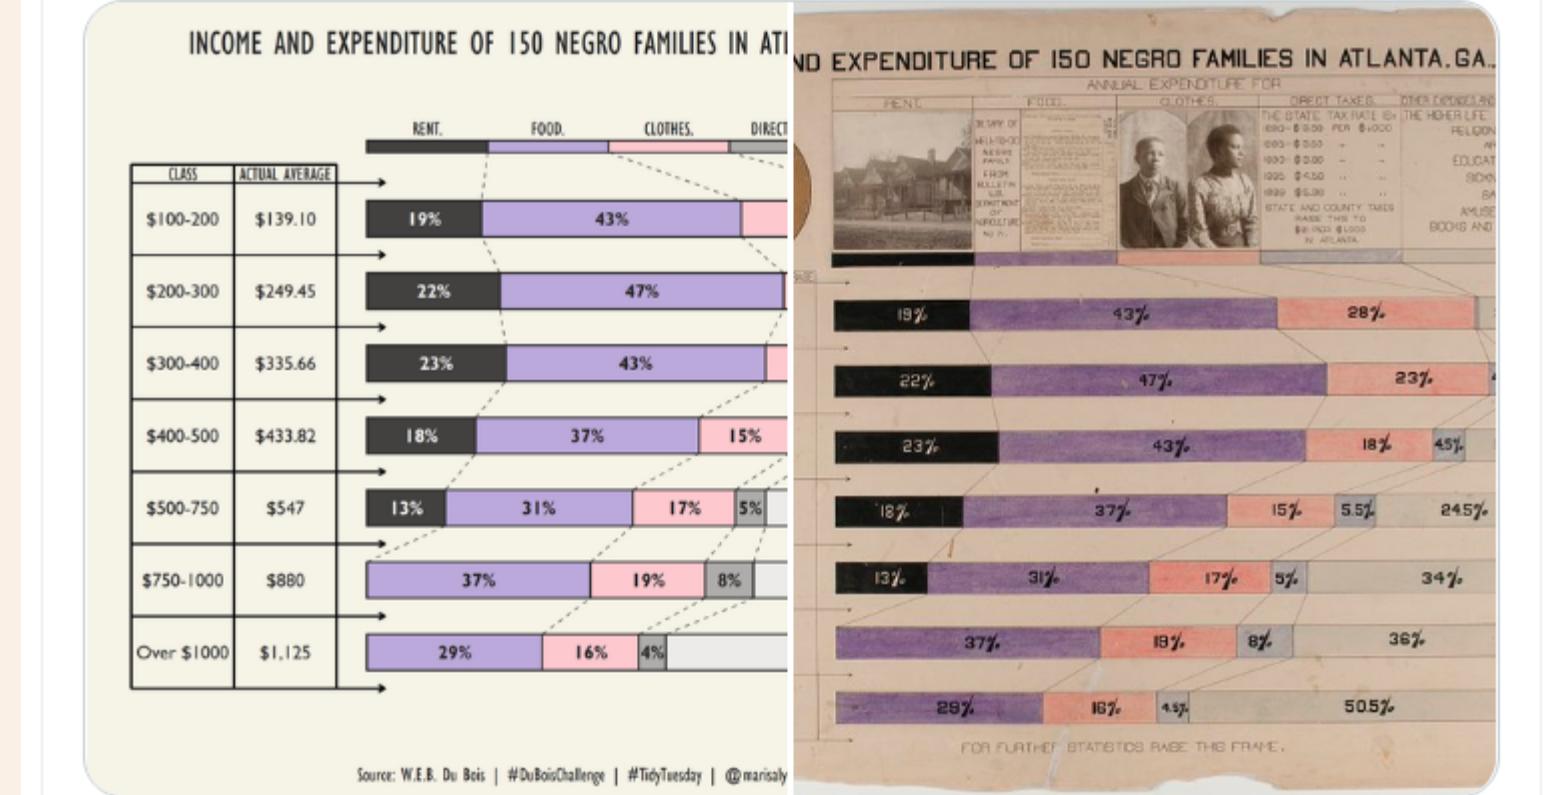

Marisa Henry

had lots of fun learning more about W.E.B DuBois and attempting to recreate one of his figures for the #DuBoisChallenge and #TidyTuesday this week!
